

**MICROENERGY  
CONSULT**

## Africa

Ethiopia

### Project Description:

The project initiates an innovative and replicable mechanism to finance clean energy technologies (CET) for households and small and middle size enterprises (SMEs) through a microcredit financing mechanism with three Ethiopian MFIs.

In addition, the project studies ways to further scale up CET usage through innovative finance mechanisms.

## Clean Energy Promotion through Microfinance in Ethiopia

Services

Technical Assistance,  
Training & Capacity  
Development
