communities in
Northern Samar

Project Description:

MEI provides support in technical capacity building, market-based solutions and institutional strengthening to enhance access to renewable energy (RE) solutions in vulnerable off-grid communities dwelling in rural upland, lowland, coastal and island areas of Northern Samar.

Services Provided:

- Design of research methodology
- Design and adaptation of research tools (questionnaire, focus group discussion and key informant interview guides)
- Identification of RE suppliers
- Adaptation of the proprietary Supplier Assessment Toolkit
- RE supplier assessment
- Quality assurance on data collection, analysis and report writing

Energy technologies & energy uses:

Solar
