Project Description:

MEI is tasked to support Yemen Emergency Electricity Access Project by carrying out an assessment of the microfinance sector in the country.

The assignment's objective is to assess the ability of the Microfinance Institution (MFI) sector in Yemen to support the project implementation and inform the selection criteria for MFIs to be engaged.

Services Provided:

- Development of research framework development
- Development of research indicators, surveys and questionnaires.
- Desk research, stakeholder interviews and focus group discussions.
- Preparation of research tools, data collection and verification
- Analysis of MFI performance and MFI selection.
